EXPERIENCE

Developer Intern

November 2024 – December 2024

QuodeWorks, Bangalore

Remote

- Crafted sophisticated web platforms infused with artificial intelligence, achieving high engagement rates through improved design aesthetics and seamless functionality while directly increasing average session duration by over three minutes per visitor.
- Fortified SQL databases with encryption protocols and access controls, slashing unauthorized data access attempts by 60% and bolstering data integrity, as validated through weekly security audits performed.
- Optimized, debugged, and refined complex code to enhance performance, ensure seamless operations, and maintain system reliability and scalability.

PROJECTS

Gemini API-Based Recruitment System | Python, Flask, MongoDB

December 2024

- Constructed a full-stack recruitment platform featuring a REST API using Flask and Bootstrap, enabling seamless communication between frontend and backend, and leading to the identification of 200+ qualified candidates.
- Leveraged Gemini API with prompt engineering for enhanced candidate matching.
- Utilized prompt templates for data extraction and evaluation reports generation processes to improve system efficiency and engagement.

AI-Powered Sentiment Analysis Web Application | Hugging Face, Python, Flask, Git

November 2024

- Developed a sentiment classification app using Hugging Face Transformers (DistilBERT) achieving 92% accuracy, featuring a Flask backend and HTML/CSS/JavaScript frontend.
- Improved sentiment analysis efficiency for text-based user input, enhancing business decision-making capabilities.
- Visualized real-time runs with wandb.ai and deployed the model on Hugging Face Spaces.
- Explore the project on my [Hugging Face repository](#).

Face Recognition Student Attendance System | Python, Tkinter, OpenCV, MySQL

February 2024

- Engineered an Advanced Face Recognition Student Attendance System that integrated Python OpenCV and MySQL, enhancing security measures for 500+ students while ensuring compliance with access control regulations.
- Designed and controlled the user interface using Tkinter GUI, integrating Python OpenCV and MySQL Database for managing training datasets and maintaining 100+ student records.

TECHNICAL SKILLS

Programming Languages: Python, Java, HTML/CSS, JavaScript, C/C++

Frameworks & Libraries: Flask, Bootstrap, Tkinter, TensorFlow, HuggingFace Transformers, NumPy, Pandas

Developer Tools: Git, GitHub, VS Code, IntelliJ, Jupyter Notebooks

DevOps & Cloud: Docker, Kubernetes, Jenkins, Terraform, GitHub Actions (CI/CD), AWS (EC2, S3, RDS)

Databases: MySQL, MongoDB Atlas

Certifications and training: DevOps, Agile and Design Thinking by IBM ([view](#)), DevOps Fundamentals by IBM ([view](#)), Cloud Computing: NPTEL ([view](#)), Oracle Certified Java Foundation Associate (*Ongoing*)

EXTRACURRICULAR

Student Volunteer

September 2023 – May 2024

PAHAL FOUNDATION

VIT Bhopal

- Tutored a class of 30 underprivileged children in reading comprehension to provide them with basic education.
- Managed the frontend as a graphics designer to design invitations, logos and posters for the NGO.
